SUMMARY

Motivated Software Engineer skilled in full-stack web and AI-based application development using React.js, FastAPI, and MongoDB. Experienced in cloud deployments, API integration, and building scalable real-world solutions.

SKILLS

- **Languages:** JavaScript, Python, C
- **Front-End:** HTML, CSS, React.js, Next.js, Bootstrap, Streamlit
- **Back-End:** Node.js, Express.js, FastAPI, Flask, MongoDB, Firebase, MySQL, Redis, Celery
- **Cloud & DevOps:** AWS Lambda, Docker, GitHub Actions, CI/CD, YAML
- **Tools & Platforms:** Git, GitHub, Netlify, VS Code, Figma, Studio 3T, Postman
- **Core Concepts:** OOP, REST APIs, Authentication, DOM Manipulation, Prompt Engineering, WebSockets

EXPERIENCE

Software Engineer Intern, Skill Software INC | Delaware, USA Aug 2025 - Sep 2025

- Built full-stack features with React.js, Next.js, and FastAPI, deploying scalable services via AWS Lambda and Docker.
- Optimized backend performance using MongoDB, Redis, and Celery, improving response times for high-load endpoints.
- Integrated AI-driven features through prompt engineering, reducing manual processing time significantly.
- Collaborated with cross-functional teams to deliver application requirements aligned with business goals.

Full Stack Developer Intern, Team InfoSoft | Tirunelveli Jun 2024 - Jul 2024

- Redesigned the company home page using React.js and HTML, improving user experience and visual consistency.
- Developed interactive Excel dashboards and performed data analysis to extract insights supporting business decisions.

EDUCATION

Bachelor of Technology - Information Technology Nov 2022- May 2026
Francis Xavier Engineering College Tirunelveli | (CGPA: 8.07/10)

PROJECTS

ChatNest – AI-Powered Chat Platform (React.js, FastAPI, MongoDB, MCP Server, OpenAI API, WebSockets)

- Developed an AI-powered chat application with real-time responses using the OpenAI API and WebSockets.
- Integrated an MCP Server for model context management and deployed a scalable backend with FastAPI, Node.js, and MongoDB.

Face Recognition Attendance (Python, FastAPI, React, OpenCV, NumPy, CSV/Excel)

- Built an AI-powered attendance system with real-time face detection and recognition using OpenCV and face-recognition libraries.
- Integrated FastAPI for backend processing and React for the frontend interface; automated attendance logging to CSV/Excel.

Lambda GitHub Action Testing – CI/CD Automation (AWS Lambda, Python, GitHub Actions, CI/CD, YAML)

- Developed and automated a CI/CD workflow integrating AWS Lambda with GitHub Actions to streamline serverless deployments
- Implemented test automation and error handling to validate Lambda functions before deployment, leveraging AWS SDK and YAML pipelines

PATENT

ECO-WELL – Combining Sustainability and Well-being: Food & Medicine Management System
